

Re: NAB petition 04-160To: FCC

To Whom it may concern at the FCC,

My name is Chris Thomas, I am a current subscriber to XM Satellite Radio.

Satellite radio is a tremendous benefit to me, and one which I gladly pay for out of my own pocket. I make many road trips per year and receive tremendous benefit from XM's traffic and weather channels. I like it that I can easily access the information I need no matter where I find myself geographically located.

I am strongly opposed to any measure that limits my ability to receive traffic reports, weather or any other public information while using my XM service.

Any measure that limits what I can hear through satellite radio is completely wrong and is contrary to what a person in a free society expects of their right to have information presented to them.

Please reject NAB petition 04-160

Sincerely,  
Chris Thomas
